

【About PandaHome】

PandaHome is a theme management application on Android platform developed by NetDragon Websoft Inc. With it, you can customize the display name, font size and color of apps and modify app icons freely as well as download and switch themes of your Home.

If you have any suggestions or comments, please email to: sgm@tqdigital.com. Thank you for your support to PandaHome!

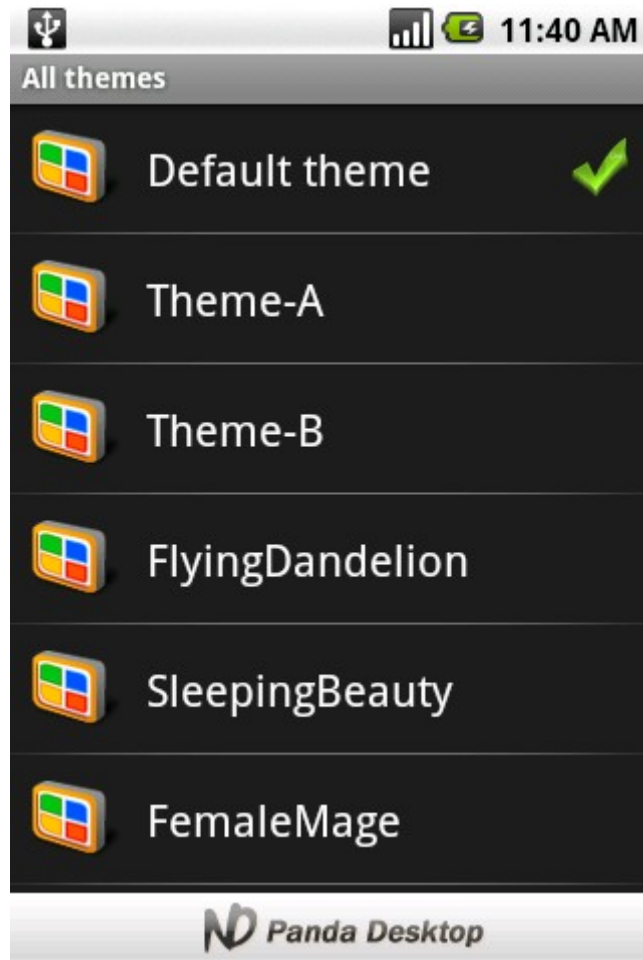

I. Enable theme quickly

After the software is installed, you can tap “Enter setting” to enter the main setting interface of PandaHome when you run the software for the first time. You can also tap “MENU” under the home screen of your phone to pop up the menu, where there is a new option “Theme Settings” through which you can enter the main setting interface of PandaHome as well.

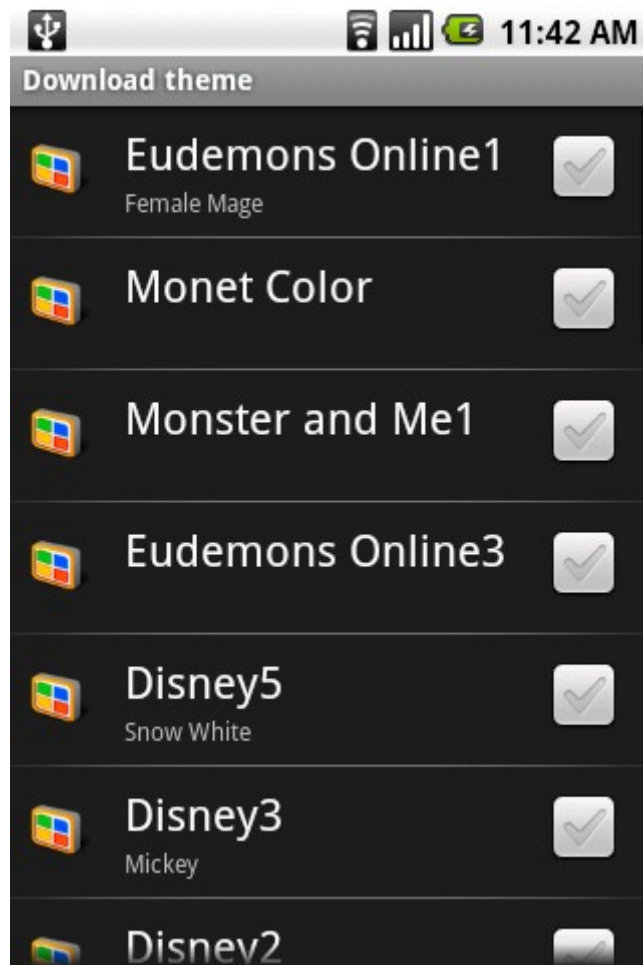

After entering the setting interface, you will find the system inbuilt “Default theme”, besides, the software also offers you two recommended themes “Theme-A” and “Theme-B” for you to choose

from.

The software has also prepared some beautiful themes for you to download. Tap “MENU” under the main setting interface of PandaHome, and then select “Download theme” to enter download list. Select a theme, the system will automatically download and install it for you. You can check the download and installation status via the system status bar on the top. After the download and installation complete, return to the main setting interface of PandaHome, you will find the new theme downloaded just now. Select “Apply”, you can set the newly downloaded theme as theme of your phone.

II. Change wallpaper

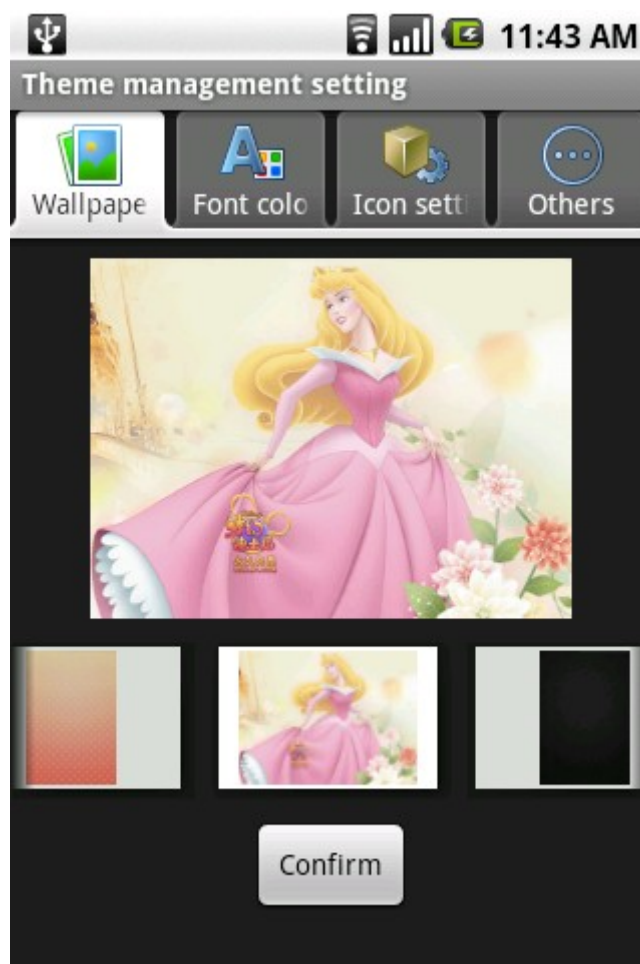

Select a theme other than the default theme, then tap “Edit” to enter theme editing mode. “Wallpaper”, “Font color”, “Icon setting” and “Others” four tabs are available here, tap “Wallpaper” to access the wallpaper setting.

Apply

Edit

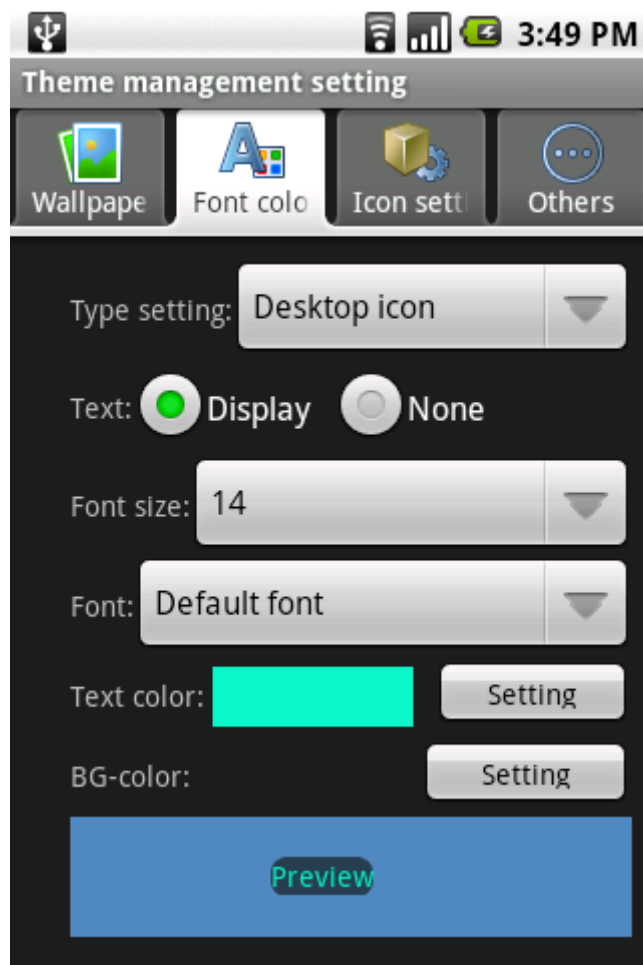

Delete

The software will read pictures saved in the directory pandahome/pictures/ for you to choose from. Select a picture and then click “Confirm”.

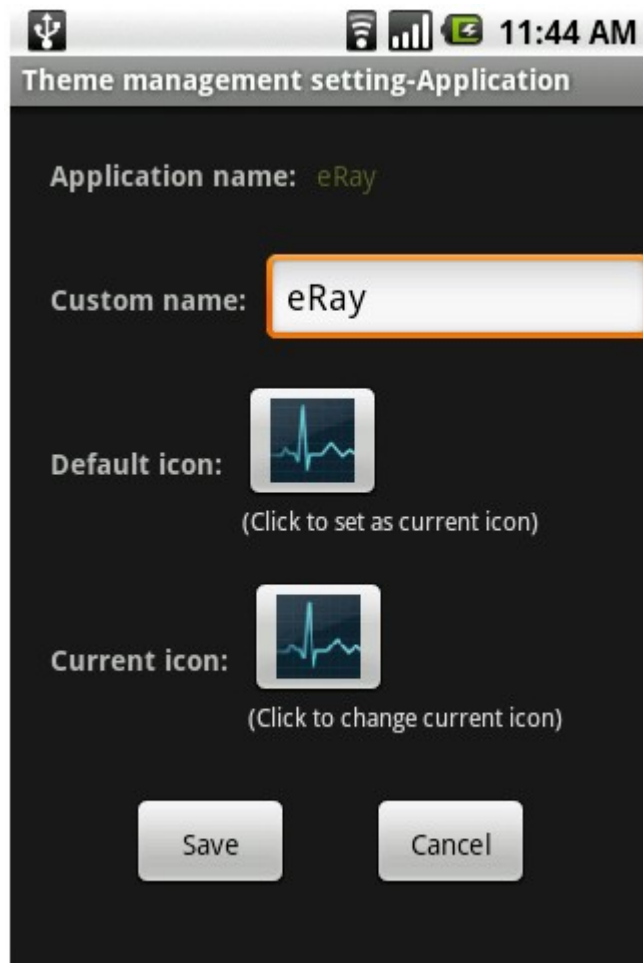

III. Change font

The “Font color” setting allows you to define whether to display icon text and customize the font size, text color, background color, etc. If you need to modify an item, just tap it to enter relevant function. The “Preview” box below will display the text effect after setting.

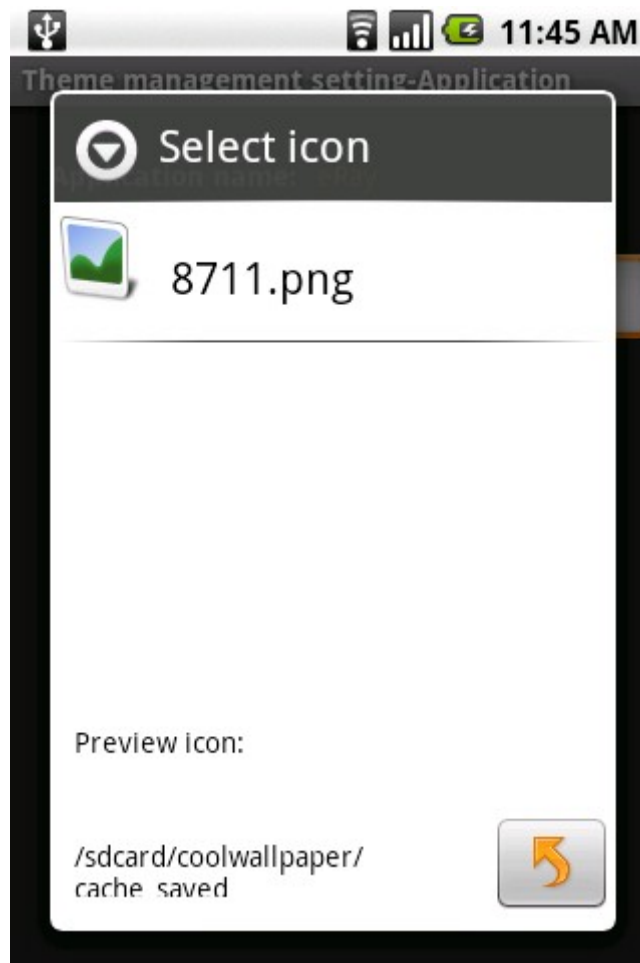

IV. Change icons

Select an icon in the “Icon setting”, you can customize its name and icon. After completing setting, tap “Save” to make you operations take effect.

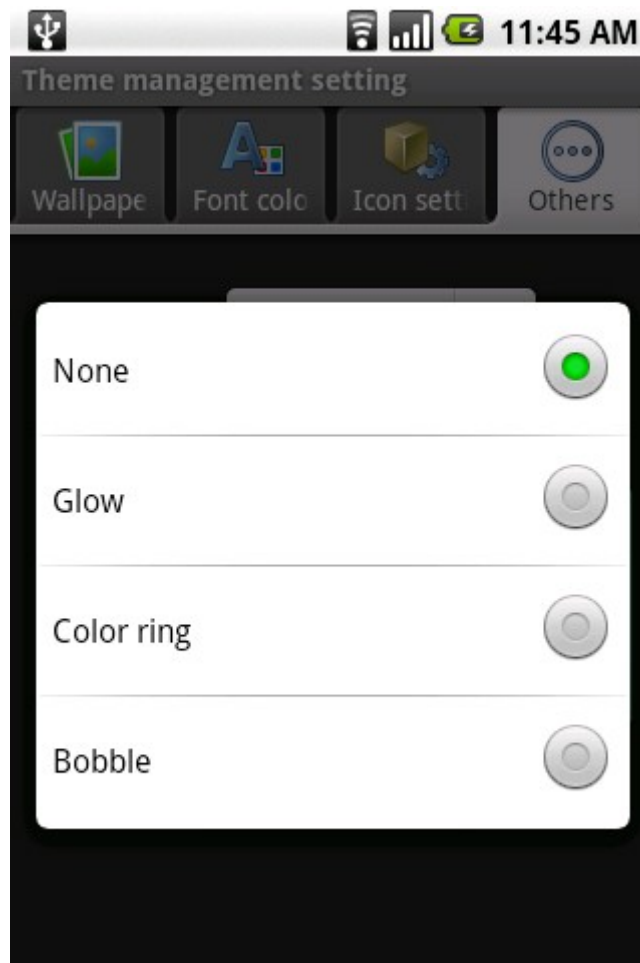

If you want to customize an icon, find the picture according to its storage path first, select certain picture and then return back to the setting interface and tap “Save” to complete the icon setting.

V. Other settings

The “Others” tab allows you to set the click effect of your phone. The software has prepared “Glow”, “Color ring” and “Bobble” three effects for you to choose from.

VI. Gravity sensor setting

Tap “System setting” in MENU on the main interface of PandaHome, you can set the gravity sensor; after setting, you can shake your phone to change themes; in addition, you can also set the theme changing mode.
